CAREER OBJECTIVE

Computer Science engineer with experience in AI-driven systems, NLP, and full-stack development, seeking to contribute to innovative projects in scalable software, intelligent systems, and cloud-based solutions. Passionate about building impactful applications that combine technical excellence with real-world value, while growing within a culture of research, collaboration, and innovation.

PROJECTS

NeuroReflect – Multimodal AI System for Mental Health Reflection

- Multimodal AI for emotion/depression detection with 85%+ accuracy.
- Used signal processing, NLP, and modular ML design.

Pet Care App

- Built cross-platform pet care app with authentication + real-time sync.
- Collaborated on UI/UX, improving test-user engagement.

EXPERIENCE

IEEE EMBS Intern | 2025

- Built AI-based mental health reflection prototype using speech + text analysis (NLP + ML).
- Improved model accuracy by 10% during testing.

IEEE CIS Intern | 2025

- Developed AI-powered stock advisory system with ML, Pandas, and technical indicators.
- Delivered working model in 2 months with 4-member Agile team.

IEEE Computer Society Execom Member | 2024-25

- Actively engaged in IEEE events & Organized 5+ workshops/competitions engaging 100+ participants
